

2026 Continuity of Care Plus

ENHANCING CARE THROUGH COMPREHENSIVE PATIENT INSIGHTS

We are pleased to announce the 2026 Continuity of Care Plus (CoC+) Program.

The CoC+ program supports providers in delivering high-quality care by using the Appointment Agenda to guide patient visits. This tool consolidates key insights, including health history, HEDIS® measures, pharmacy data, high-risk indicators, clinical information, and social determinants of health into a single, comprehensive view.

Providers can earn additional compensation by submitting completed Appointment Agendas with verified, documented diagnoses on qualified claims. Providers should ensure that the medical record accurately reflects all active conditions and, when relevant, includes resolved or historical conditions. However, medical records are not accepted as a form of submission.

Earning Opportunities

The 2026 Continuity of Care Plus (CoC+) Program offers **two distinct opportunities** for primary care providers to earn additional compensation:

1 Risk Adjustment Completion

Earn compensation by completing the **Risk Adjustment** section of the Appointment Agenda. This involves reviewing and updating the patient's active/suspected conditions to ensure accurate and complete documentation.
